

# Test Report: 9/12/06 1:52 PM Acceptance Test

## Load Configuration

The configuration section summarizes the test configuration.

<b>Duration</b>	10 minutes
<b>Start Users</b>	50
<b>Increment Users</b>	50 users every 1 minute
<b>Limit To</b>	n/a
<b>Estimated Peak Users</b>	500

Testcase	Weight	%	Net Speed	Pacing	Start	Delay	Redirect
1 create issue	1	33%	5 Mbps	Recorded	Random	1 sec	
2 browse issues	2	67%	5 Mbps	Recorded	Random	1 sec	

## Testcases

The testcase section gives statistics and measurements about each test case in the test. More than one test case can be run simultaneously, so this report helps find out which of the testcases are having performance problems. If the testcase contained a business-case, say making a purchase, then the measurements here will correspond to how long it would take a customer to make a purchase under load.

### Testcase Summary: create issue

<b>Pages</b>	8
<b>URLs</b>	26
<b>Images</b>	6
<b>Total size</b>	144,220 bytes
<b>Average page size</b>	18,027 bytes
<b>Total image size</b>	5,168 bytes
<b>Avg image size</b>	861 bytes

### Testcase Summary: browse issues

<b>Pages</b>	9
<b>URLs</b>	25
<b>Images</b>	8
<b>Total size</b>	136,907 bytes
<b>Average page size</b>	15,211 bytes

Total image size	6,845 bytes
Avg image size	855 bytes
